FEEDING

Tips and tricks

Tips and tricks in addition to amounts and frequencies:

Per the AKC - allow a pup's dish to remain down no more than 10-20 minutes to discourage picky eating

ALSO FROM AKC: :

"Begging is adorable... (b)ut don't be fooled: Begging is not an emotional crisis or a test of your love. It's what scientists might call an evolutionary survival strategy, or what the rest of us might call a scam. Allowing your dog to guilt you into overfeeding him, or serving him a steady diet of table scraps in a misguided show of affection, can have harmful or even fatal results."
